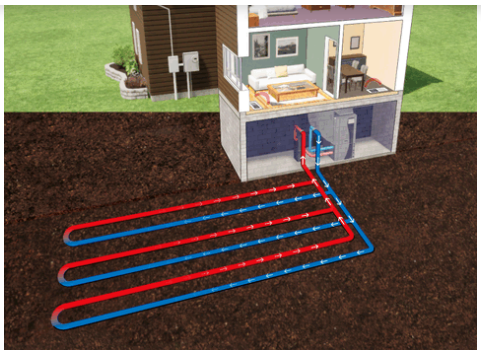
NY's Most Trusted Renewable Energy Experts
We custom-design solar and geothermal systems to build high-performance residential power plants. We use the highest quality components to ensure a longer life for your system—and to yield the best possible return on your investment.

The GEOTHERM Difference

Our difference lies in our unwavering commitment to excellence, sustainability, and customer satisfaction.

We specialize in installing solar and geothermal heating and cooling systems in Rochester, NY, and across the region. Choosing Geotherm means choosing a trusted geothermal company that delivers superior expertise and top of the line equipment for every installation.

Experience the renewable energy difference: make a positive impact on the environment while enjoying the myriad benefits of efficient, sustainable energy solutions.



Geothermal Energy

Looking for a greener way to heat and cool your home? Geothermal home energy systems are the most efficient around! With 4 different types of systems—Horizontal Closed Loop, Open Loop, Vertical Closed Loop, and the Pond/Lake Loop—there's an option that will meet your needs.
